

L&T has secured the distinction of featuring in the Carbon Disclosure Project's Global Report (CDP 500) 2013 with a ten point increase in its score over the previous report.

L&T is the sole Indian company to feature in the 'Industrial Category'. Only seven companies from India have made it to the list across different categories.

Climate change is emerging as one of the key parameters in business and investment decisions.

CDP is a not-for-profit organisation. It works with investors globally to advance investment opportunities and reduce risks posed by climate change.

This recognition has validated L&T's transparency in its operations as well as efforts taken towards emission reduction, climate strategies and low carbon growth.

L&T has also been selected as an index component of the Dow Jones Sustainability Emerging Market Indices (DJSI). This highlights the increasing global recognition of L&T's sustainability leadership in the industry. Only 9 companies from India feature in these indices. Since 1999, DJSI tracks the performance of the world's top 1000 companies in each of the 11 industry sectors.
