

L&T-Komatsu unveil Mini Hydraulic Excavator

A cost-efficient and sustainable solution for the construction industry

Mumbai, December 13, 2024: L&T Construction & Mining Machinery and Komatsu launched the Komatsu PC35MR-3 Mini Hydraulic Excavator. Compact, manoeuvrable, and versatile, it delivers exceptional lifting and digging forces, along with top-notch reach capabilities. The wide-angle swing boom enhances precision during excavation tasks at corners and edges, while facilitating straightforward digging in 270° (front, back, and side) and 90° (upside down) for a total of 360° (360°). To reduce the need for manual labour. Its low-maintenance cost reduces the overall cost of ownership. The machine is suitable for a wide range of applications - from digging foundation and trenching to demolition and utility installations, farming and other agricultural usage. Its low noise and emission levels reflect L&T and Komatsu's commitment to helping shape a sustainable world.

Commenting on the launch, Mr Arvind K Garg, Senior st-2102 rGt-2102 it

Mining Machinery market in India, manufacturing, and supporting new-generation equipment that are energy-efficient, incorporate the best-in-class technology and deliver high productivity.

Background

Larsen & Toubro is a USD 27 billion Indian multinational enterprise engaged in EPC Projects, Hi-Tech Manufacturing, and Services, operating across multiple geographies. A strong, customer-focused approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for eight decades.
